# ABOUT

"Fragments" is an aerial performance mixing silks and chains. In our rough and mechanical world, it shows the games and the stakes of power, the constraint, the alienation... and the path we try to follow towards this ideal of liberation, of fulfillment.

But is that path so simple and obvious to find..?

This performance, as poetic as powerful, proposes to use the silks as well as the metal chain as circus apparatus, showing the duality, the contrast between the roughness of the metal and the softness of the silks... It is an original and unexpected invitation to embark for an unforgettable and unique journey

# S T E E T

Show for all ages  
Aerial circus  
Adapted for the street  
Duration : 30 min  
Without words

The purpose of the installation of the show is to create an enveloping atmosphere. The sound/lighting system is battery-powered, requires no cabling, and is installed in the public area. It is preferable for the show to take place at night, but a daytime version is also possible.
